\* "Total Utility Cost (\$)" represent what those in the aggregation would have paid if they stayed with Duke's Standard Service Offer

Notes: Over the last 12 months, the average participant has saved over \$120 (8.7%) compared to Duke's default generation rate. Even during the winter where Duke has a unique rate structure for those that use over 1,000 kWh, the majority of residents still saved money ("% of Accounts w/ Positive Performance" column).
